1. Security

As a customer, I want to be requested to enter a strong password when I sign up for the trees4me app, so that my password is difficult to hack.

Given that I'm a Trees4Me user, when I sign up for a new account and enters a weak password, then the App warns me to enter a strong password.

2. Compatibility

As a product owner, I want the App to be compatible with both IOS and Android devices, so that there are not limitations for users to use App.

Given that I'm a Trees4Me user, When I install the Trees4Me App on my Android or IOS device, then the app runs on both platforms with no issues.

3. Usability

As a user, I want to be able to use the App and navigate to different screens with no delay, so that I continue shopping for trees.

Given that I'm a Trees4Me user, when I open the app and start shopping, then the App pages load quickly and with no significant delay.

4. Availability

As a product owner, I want the app to be available all the time, so that users continue shopping at their convenient time.

Given that I'm a Trees4Me user, when I open the app at midnight during a public holiday, then the App opens, and all products are available for order.

5. Scalability

As a product owner, I want the app to be scalable, so that new features can be added without causing downtime.

Given that I'm a product owner, when I request the developers to add a new feature, then the feature is added without causing interruption to the users.
